Worked solutions to selected problems from the ACM International Collegiate Programming Contest (ICPC) Colin Dooley, Stiofain Fordham, Colm ´ O D´ unlaing´

ACM ICPC Worked Solutions

Finding the optimal cost of doing so is the actual problem we are solving here. I'm doing that later using the min cost matching, others are doing it using the mincost maxflow. In the part of my solution you are quoting I'm just computing the cost of one special case: the one where each party is served by a different team.
