Label the muscles and associated structures in the following diagrams by writing the names of the labeled parts in the spaces provided. After labeling, color-code the muscles to help you to distinguish them.

## **STUDY GUIDE - faculty.scf.edu**

The structural unit of a muscle is the muscle fiber, while the functional unit is a motor unit. Skeletal muscles mostly act in antagonism, meaning that when one contracts to create the movement (agonist), the corresponding opposite one relaxes (antagonist). Muscles working as antagonistic pairs are responsible for creating a smooth movement.

## **Musculoskeletal system: Main bones, joints & muscles | Kenhub**

Questions to answer: 1) Describe the relationship between the transverse tubules and the sarcoplasmic reticulum (use their functions to explain the relationship). 2) Distinguish between skeletal, smooth, and cardiac muscle. Include where in the body each type of muscle is found.
