An audio engineer (also known as a sound engineer or recording engineer) helps to produce a recording or a live performance, balancing and adjusting sound sources using equalization and audio effects, mixing, reproduction, and reinforcement of sound.

Audio engineer - Wikipedia

The very basic idea of audio engineering is being able to get sound from one place, to another. For example, if we think about what happens in concerts - sound starts with the vocalist singing into a microphone. Where does the sound go from there? How does the crowd get to hear it coming out of speakers?
