Stages Of The

The cell cycle is a phenomenon in biology unique to eukaryotes.

Cell cycle phases consist of stages collectively called interphase, and an M phase (mitosis) that includes prophase, metaphase, anaphase and telophase.

Biology lab safety rules are guidelines designed to help keep you safe while you are experimenting. Some equipment and chemicals in a biology laboratory can cause serious harm. It is always wise to follow all lab safety rules. Don't forget, the most helpful safety rule is to use plain old common sense.

cytometry is used by scientists and researchers to count or sort cells based on specific properties. By labeling cellular DNA with a fluorescent dye, flow cytometry can sort cells based on the amount of DNA present, thereby making it possible to distinguish between cells that are in different stages of the cell cycle.
