High diagnostic value of plasma Niemann-Pick type C ...

title = "Granins as disease-biomarkers: Translational potential for psychiatric and neurological disorders", abstract = "The identification of biomarkers represents a fundamental medical advance that can lead to an improved understanding of disease pathogenesis, and holds the potential to define surrogate diagnostic and prognostic endpoints.

Granins as disease-biomarkers: Translational potential for ...

High Diagnostic Value of Plasma Niemann-Pick Type C Biomarkers in Adults With Selected Neurological and/or Psychiatric Disorders Late-onset Niemann-Pick type C (NP-C) is a rare, underdiagnosed lysosomal disease with neurological manifestations. A specific treatment, miglustat, can stabilize the disease if given early.

High Diagnostic Value of Plasma Niemann-Pick Type C ...

A glial cell protein called S100B is a validated, reliable biomarker of blood-brain barrier (BBB) disruption and brain injury.1In Europe, emergency departments are using a serum test for S100B to assess the severity of head injuries.

A Biomarker for Childhood Emotional Trauma? - Consult QD

These genes and their co-expression networks were enriched for genes associated with several psychiatric disorders. Findings suggested overlapping neurological molecular underpinnings of psychiatric disease. According to the authors, many psychiatric disorders can be conceptualized as disorders of brain maturation during childhood and adolescence.
