Brain Inflammation

Mood disorders such as depression and anxiety, as well as more serious conditions like autism, dementia, and even schizophrenia, have all been linked to inflammation of the brain.<

Inflammation is also a contributing factor in such health issues as cardiovascular disease, asthma, and allergies; autoimmune diseases like arthritis and hypothyroidism may be influenced by inflammation as well.

Brain Inflammation - Integrative Psychiatry

Severe inflammation of the brain, or encephalitis, is more than occasional forgetfulness and inability to concentrate and is very serious.

Encephalitis is very rare and can result in inflammation so severe it causes swelling of the brain, seizures and a rapid decline in the mental state.
