Bsa M20 Change Valve Guide

The M20 started out with hand-change gearbox, with the lever on the right, a rigid frame and girder forks. The bottom end design was common across the BSA range of singles, being used on both their M range of side valve and OHV heavy duty motorcycles and the lighter weight B series, including the famous Gold Star.

replace the spring and plug. The other ball valve is located between the return pump (Fig. 6), and apparent failure of the return pump may be due to this ball having stuck in its seating. To rectify, remove the pump cover plate, insert a piece of wire into the valve orifice and lift the ball off its seating. Should the trouble keep recurring it may

Technical information - BSA M20

BSA actually fitted cast iron guides to the later aluminium alloy heads but we recommend the bronze as detailed above. We can of course supply the cast iron if preferred; they were fitted from engine numbers CA7SS 4024 and CA10R 5602. We also have some oversize versions of 67-1110 valve guide - 0.002 and 0.004. Pre-unit B Group Model: Years ...

How to MOVE Valve Guides the EASY Way

At the outbreak of World War II BSA were Britain's largest motorcycle manufacturer with a long history of armaments supply to the armed forces. Designed by Val Page the BSA M20 started development in 1937 as a heavy-framed sidecar model with a simple 500 cc single cylinder side valve engine. It had low compression and plenty of low-end torque through a standard BSA gearbox.
