What’s interesting is that this site is built to facilitate creation and sharing of e-books online for free, so there is no registration required and no fees.

Climatology Robert V Rohli Anthony

Climatology (from Greek κλίμα, klima, "place, zone"; and -λογία, -logia) or climate science is the scientific study of climate, scientifically defined as weather conditions averaged over a period of time. This modern field of study is regarded as a branch of the atmospheric sciences and a subfield of physical geography, which is one of the Earth sciences.

Earth is the third planet from the Sun and the only astronomical object known to harbor life.About 29% of Earth's surface is land consisting of continents and islands.The remaining 71% is covered with water, mostly by oceans but also by lakes, rivers and other fresh water, which together constitute the hydrosphere.Much of Earth's polar regions are covered in ice.

Earth - Wikipedia

Vento é o fluxo de gases em grande escala. Na superfície da Terra, o vento consiste no movimento de ar em grande quantidade. No espaço sideral, o vento solar é o movimento através do espaço de gases e partículas carregadas emitidas pelo Sol, enquanto que o vento planetário é a desgaseificação de elementos químicos leves a partir da atmosfera de um planeta em direção ao espaço.
