The systems use reliable and accurate sensors to measure the weather variables of interest. Depending on output/input requirements, the data logger outputs either an analog voltage or digital RS-232 / RS-485 in ASCII or MODBUS format, or 4 -20 mA current loop for connection to the plant's DCS, PLC's or SCADA system.

002 Industrial Weather Station - Met One Instruments

The weather station problem. Most weather stations are cluttered, complicated, and frustrating to install and maintain. Wiring and programming all the components can be a nightmare, and finding room to mount everything can be a challenge.. All-in-one weather stations solve many of these problems, but the tradeoff is flexibility.
