4 divided by 32 is 0, with a remainder of 4. You can ignore the remainder for now. Put the 0 on top of the division bracket. This is the beginning of the quotient answer. Next, multiply 0 by the divisor 32 and insert the result 0 below the first number of the dividend inside the bracket. $0 * 32 = 0$.

PDF Commoncore sheets Division

The quotient is the number of times a division is completed fully, while the remainder is the amount that is left that doesn't fully go into the divisor. For example, 127 divided by 3 is 42 R 1, so 42 is the quotient and 1 is the remainder.
