The descriptive phenomenological method in psychology was developed by the American psychologist Amedeo Giorgi in the early 1970s. Giorgi based his method on principles laid out by philosophers like Edmund Husserl and Maurice Merleau-Ponty as well as what he had learned from his prior professional experience in psychophysics. Giorgi was an early pioneer of the humanistic psychology movement, the use of phenomenology in psychology, and qualitative research in psychology, and to this day continues

The author explains that his background was in experimental psychology but that he wanted to study the whole person and not fragmented psychological processes. He also desired a non-reductionistic method for studying humans. Fortunately he came across the work of Edmund Husserl and discovered in the latter's thought away of researching humans that met the criteria he was seeking.

The descriptive phenomenological psychological method.

Abstract. Phenomenology in the modern sense of the term is dated from 1900 when E. Husserl published Logical Investigations (1900/1970), although the phenomenological method itself was not explicitly practiced in that work. It was in Ideas I (1913/1983) that Husserl made the method explicit. It is important to appreciate that to make phenomenological claims in the strongest sense one would have to use some version of the phenomenological method, along with certain other key

The Descriptive Phenomenological Method in Psychology: A ...

Phenomenology within psychology is the psychological study of subjective experience. It is an approach to psychological subject matter that has its roots in the phenomenological philosophical work of Edmund Husserl. Early phenomenologists such as Husserl, Jean-Paul Sartre, and Maurice Merleau-Ponty conducted philosophical investigations of consciousness in the early 20th century. Their critiques of psychologism and positivism later influenced at least two main fields of contemporary psychology:

Phenomenology (psychology) - Wikipedia

By far the best known descriptive approach in psychology is that of Amedeo Giorgi (1985), who is widely credited as a pioneer in bringing phenomenological thinking into psychology. Giorgi's method can be seen as a form of distillation, in which the analyst step by step sifts away everything that is not essential to an adequate description of the phenomenon.
