There are two major challenges to successful digital infrared photography, even for those who use IR-modified cameras. Setting the correct White Balance is a huge hurdle. The second is the Channel Mixing that must happen during post processing. Here is what works for me.

### How to Shoot Digital Infrared Photography | Shutterbug

Infrared photography is similar to black and white photography, in that you are dealing with a limited number of tones. To add more dynamism and energy to your infrared shots, add contrasting elements. By this I mean using dark and light objects in close proximity to each other. But also use smooth and textured objects together.

### How to do Surreal Digital Infrared Photography Without ...

Shooting Infrared Photography Taking an IR photo doesn't differ too much from taking a normal photograph—at least in terms of concepts like composition and exposure. With an IR filter, you'll need to use long exposure techniques because of how dark the filter is (including a tripod), but the shutter speed, ISO, and aperture can balance out just like with a normal image.

A few tips that might help you achieve the infrared look are: If you want to create a soft, glowing appearance in your image try to avoid increasing the contrast slider. Instead, to increase the depths of the blacks, use the "Amplify Blacks" slider.

### **Processing Digital Infrared Photography - Lenscraft**

For all of my early filtered digital IR images, I use HOYA's ([www.thkphoto.com](http://www.thkphoto.com)) Infrared (R72) filter because it is affordable and works great. In smaller sizes, such as 52mm, the HOYA R72 costs less than \$40, making it a bargain for digital infrared photography. On the other hand, if you need a 72mm filter, expect to shell out almost \$265.

The second way to capture IR with your digital camera is to convert to a dedicated IR camera by changing the filter directly in front of the camera's image sensor. In digital cameras the image sensor has a small filter placed in front of it called a 'hot mirror' filter, which acts to reflect infrared light.

### **Digital Infrared Photography: A Startup Guide - Luke ...**

At first, I converted all my digital infrared files to black-and-white. For a few years, I shot with the Fujifilm UVIR, a DSLR really designed for forensic purposes, but I eventually graduated to a Nikon D600 converted for shooting color infrared by LifePixel, one of several companies that perform the service. LifePixel offers a range of "filter" options installed over the camera sensor ...
