CRUCIAL PART OF THE WATER CYCLE As part of the hydrologic cycle, which was detailed in the Earth's Fresh Water chapter, water spends a lot of time in the atmosphere, mostly as water vapor. All weather takes place in the atmosphere, virtually all of it in the lower atmosphere. Weather describes what the atmosphere is like at a specific time and place, and may include temperature, wind, and ...

9.1 The rocky surface of the planet is subjected to processes that break down rocks and move materials. This chapter focuses on the weathering and erosion of rocks to form sediments, and the transport and modification of sediments to sites of deposition. Weathering and erosion impact the surface of the land in many way.
