Excel expert David Ringstrom, CPA, walks you through the basics of Excel spreadsheets, providing the knowledge needed to create functional spreadsheets and manipulate large lists of data. David presents an overview of the different types of files you can create, explains Excel's rows and columns grid, demonstrates how to remove duplicates from a list, shares keyboard shortcuts to simplify repetitive tasks, and more.

### Excel 101: Introduction to Spreadsheets - Presented by ...

Microsoft Excel is a spreadsheet program that is used to record and analyse numerical data. Think of a spreadsheet as a collection of columns and rows that form a table. Alphabetical letters are usually assigned to columns and numbers are usually assigned to rows. The point where a column and a row meet is called a cell.

### Introduction to Microsoft Excel 101 - Guru99

David demonstrates every technique at least twice: first, on a PowerPoint slide with numbered steps, and second, in the subscription-based Office 365 version of Excel. David draws your attention to any differences in the older versions of Excel (2019, 2016, 2013, and earlier) during the presentation as well as in his detailed handouts.
