A Live Sound Training Template

The cables used to connect components of a sound system have three wires (conductors), similar to the three prong plug used to supply power to grounded electrical equipment. The electrical circuit used to pass a signal between sound equipment is 'balanced'. This means that two of the three conductors are dedicated to carrying the 'hot' and 'cold' path for the circuit carrying the ...

A soundboard (also known as a Mixing Board, Mix Console or Sound Desk) is a complex and sometimes intimidating piece of equipment. Here is a very basic guide to setting up a mixing board for a small live show with a basic bare bones PA system setup.

How to Set Up a Sound Board: 14 Steps (with Pictures ...

The easiest way to record your band for a live stream is to use a mixer with stereo recording capability. This will allow you to create a live mix (much in the same way you create a mix for a live performance). If your band is already gigging and rehearsing, chances are you're already looking for a good mixer.

Creating a Livestream Setup for Live Performance | PreSonus

Seriously, this should go without saying, but in the rush of setting up for live sound, engineers often forget to reset the board between shows. As a result, many soundchecks and performances start off with serious frequency imbalances that could have been avoided if the engineer had just started with flat EQs. 2. Focus on the Mix

8 Essential EQ Tips for Live Sound | Sweetwater

This is a simple look at how to set up a live sound stage with equipment and mics. This does not cover every aspect of live sound nor should it be your only source for information when it comes to assembling sound systems.

Live Sound Set UP With Ben And J - YouTube

Try this: get an XLR female to TS (1/4") male converter. Many boards will have a line-in channel that doesn't have an XLR input. You might use that input for an iPod or something, but the tape input will work just as well for that. Plug the mic (with the converter) into the line input and crank it.

A live sound system is a lot more than just a mixer and your mics. You'll need speakers for sound reinforcement, and if you don't go with in-ears, then you'll need quality stage wedges for monitoring, too. PA speakers today come in a wide range of shapes and sizes.

Live Sound & Lighting | Sweetwater

Hardware recorders for live sound span from inexpensive stereo field recorders to high-capacity rackmount recorders with 24 input channels or more, like the JoeCo BlackBox. While features such as onboard microphones and connectivity vary across the board, hardware recorders offer a few noteworthy benefits.
