Use a narrow aperture. Because landscape photography necessitates that both the foreground (the objects in the shot closest to you) and the background (the elements of the photo which are furthest away) are in focus, setting a narrow aperture is essential. Try using a somewhat large f/number, like f/11 for example. 3.

20 Great Tips for Mastering Landscape and Outdoors Photography

We can't promise you that you will be a master landscape photographer at the end of this course. What we can promise is you will have a much clearer idea of what is involved in pursuing this journey. The class is based on the idea that landscape photographs can communicate more than a beautiful scene. They can be a medium by which we can share our experiences with their viewers.
