Determine the resultant internal normal force acting on the cross section through point A in each column.

## **Solution Manual " Mechanics of Materials ", R. C. Hibbeler**

...

Mechanics of materials is a study of the relationship between the external loads applied to a body and the stress and strain caused by the internal loads within the body. External forces can be applied to a body as distributed or concentrated surface loadings, or as body forces that act throughout the volume of the body.
