Urethane Single Stage Paints When urethane paints are applied in stages, the last stage is applying the "clear coat" or layer of protector design to add to the sheen of the paint and protect it from damage. This is not part of the urethane process, but it is common even with single-stage urethane paints.

Can You Sand Single Stage Urethane Paint? | It Still Runs

Painted car on Wednesday night using PPG Omni MTK acrylic urethane Single Stage and my last coat has a lot of orange peel. Is my best bet to wet sand with 1500 or buff out? Any advice would be appreciated. Dave Mar 14th, 2010, 05:51 AM #2. TOGWT. View Profile View Forum Posts View Articles Star Kicker Join Date Jan 2004 ...

If you use a solid color you can wet sand
and buff single stage too. I painted my
FJ40 with Napa crossfire urethane in my
dusty garage. Lots of wet sanding and
buffing and it came out great. I've got 1
paint bubble that recently popped up
but I did paint it back in I think 2002 so I

Four parts primer, one part catalyst and one part reducer. For the color coat, I used Omni MTK acrylic urethane single stage. Single stage means that no clear coat is needed for the gloss sheen. The color coat is high gloss.

Automotive Paint On Furniture - Painted by Kayla Payne

Single-stage urethane paint saves you time by combining gloss with a thicker urethane resin for quick coverage in one stage. However, single-stage urethane paint is often too thick to mist properly in a spray gun. If you want to use an airless spray gun with single-stage urethane paint, you'll need to reduce the paint.
