Surveying is about mapping the natural and built environments. Surveying of the land has formed the basis of all civilisations which have built or farmed and continues to underpin every piece of architecture, infrastructure, rural, urban or mining development. Cadastral land surveyors ensure the integrity of Australian property boundaries, legally defining the dimensions of new and existing land, reserves, easements and strata titles.

### What is land surveying and property development | UNSW ...

A property surveyor determines the precise location of roads, buildings, and other features of a specific property. This information is then used to determine any changes to the property line, restrictions on what may be built or where new structures must be located, how large structures may be, and the appropriate building depths for foundations.
