along a DOM element. touchend: a finger is removed from a DOM element. Each touch event includes three lists of touches: touches: a list of all fingers currently on the screen.

Developing for Multi-Touch Web Browsers - HTML5 Rocks

One of the most common topics dominant men want to talk to me about are the rules for their submissive, more specifically what rules to create, what rules to avoid, and how to enforce them. The entire concept of the D/s dynamic is a relationship built around a ruleset. Some of these rules are inherent [...]
