HVAC Unit 15 Review Questions and Review Test. Terms in this set (34) 1. Name three types of automatic controls. ... When the control transformer is not working, the indoor fan will not run in the FAN ON position. True. 12. What should be turned off while working on the compressor circuit? The unit disconnect.

Unit 15 Troubleshooting Basic Controls Flashcards | Quizlet

A traditional TEV is affected by the pressure drop across the valve. Increased pressure difference tends to open the valve more. A balanced port valve is designed to counteract the effect of pressure difference across the valve, so the valve can retain good control at a much wider range of operating conditions.
